SUMMARY

I am an Artificial Intelligence & Data Science engineer with hands-on experience building fullstack applications, scalable Node.js/Python backend services, and AI-native products. Proficient in React, REST APIs, relational databases (PostgreSQL/MySQL), and AWS cloud deployments. Passionate about developing production-ready workflows, optimizing query performance, and building resilient systems.

EDUCATION

Dr. D. Y. Patil Institute of Technology <i>B.E. in Artificial Intelligence & Data Science CGPA: 7.09 / 10.00</i>	Pune, Maharashtra 2022 – 2026
Late B G Kabra Jr College <i>12th MSBSE Percentage: 83.67 / 100.00</i>	Malegaon, Maharashtra 2022
Vidya Vikas International School <i>10th CBSE Percentage: 87.20 / 100.00</i>	Malegaon, Maharashtra 2020

SKILLS

Fullstack Engineering: JavaScript, TypeScript, React, Node.js, Python, FastAPI, RESTful APIs, JSON

Database & Data Modeling: PostgreSQL, MySQL, Schema Design, Query Performance Optimization, Structured Data Parsing

Cloud & DevOps Workflows: AWS (EC2, S3), GitHub Actions, Git, CI/CD Pipelines, Docker, Agile/Scrum

AI-Native Engineering: LLM Fine-tuning, RAG Pipelines, LangChain, PyTorch, LSTM Neural Networks, Vector Databases

Tools & Visualization: Power BI, Tableau, Looker Studio, Automated Workflow Tooling

EXPERIENCE

Parallel Learning <i>Software Engineering Intern</i>	Pune 09/2025 – 01/2026
Backend & Service Optimization: Refactored database schemas and complex relational queries, reducing average API response latency by 25% and ensuring seamless high-concurrency data flow. Cloud Deployments & Automation: Orchestrated application deployments and static asset hosting across AWS EC2 and S3 instances, while automating internal workflows to cut manual operational work by 4%. Cross-Functional Product Delivery: Collaborated closely with cross-functional teams to translate abstract product requirements into production-ready software features.	

PROJECTS

AI-Powered Legal Document Translation System <i>Sponsored Project</i>	Python, FastAPI, REST APIs, React 2026
- Fine-tuned the Sarvam LLM locally on specialized domain corpora to ensure high terminology precision and domain accuracy. - Utilized PyMuPDF for document parsing and built clean REST API endpoints serving structured JSON outputs across 150+ legal documents. - Implemented automated schema validation to enforce strict structural output standards and maintain complex document formatting.	
Automated Candlestick Predictor (Fullstack Platform) <i>Personal Project</i>	React, FastAPI, PyTorch, Node.js 2026
- Architected an end-to-end fullstack platform consuming real-time streaming market data over WebSockets with 99.9% pipeline uptime. - Engineered a PyTorch-based LSTM model analyzing sequential time-series patterns across 60-candle windows to serve predictive API endpoints. - Built an interactive React dashboard with automated CI/CD deployment pipelines using GitHub Actions for continuous data ingestion.	
Intelligent Knowledge Assistant (RAG Pipeline) <i>Personal Project</i>	LangChain, Vector DB, Node.js, Python 2026
- Built a Retrieval-Augmented Generation (RAG) system using LangChain and Vector Databases for semantic querying over private datasets. - Integrated evaluation and observability metrics to monitor response relevance, decreasing hallucination rates by 30% across data queries.	

CERTIFICATIONS

Supervised Machine Learning (DeepLearning.AI) | Data Analytics Program (Godrej)

LEADERSHIP & CO-CURRICULAR

Treasurer, Team Sanskriti: Oversaw financial planning, resource distribution, and budget allocation for major campus events.

Management Team, Team Devkraft: Organized technical events for 500+ student participants, directing logistics and team execution.

Coding Member, Team Airawat: Collaborated on embedded firmware development and data processing for an E-Bike design project.

Hackathons: Participant in Devclash 24-hour Hackathon.
