SUMMARY

Final-year Artificial Intelligence & Data Science engineering student with hands-on experience in cloud deployments, process automation, REST API architectures, and data processing pipelines. Proven track record in AWS environment setups, backend database optimization, networking fundamentals, and continuous delivery tools to support scalable IT and NOC operations.

EDUCATION

Dr. D. Y. Patil Institute of Technology <i>B.E. in Artificial Intelligence & Data Science CGPA: 7.09 / 10.00</i>	Pune, Maharashtra 2022 – 2026
Late B G Kabra Jr College <i>12th MSBSHSE Percentage: 83.67 / 100.00</i>	Malegaon, Maharashtra 2022
Vidya Vikas International School <i>10th CBSE Percentage: 87.20 / 100.00</i>	Malegaon, Maharashtra 2020

SKILLS

Languages & Scripting: Python, SQL, JavaScript, React, FastAPI, REST APIs, JSON
DevOps & Cloud Automation: GitHub Actions, Git, CI/CD Fundamentals, AWS, Agile/Scrum
Networking & System Basics: TCP/IP, DNS, Linux/Windows Administration, Webhooks
Machine Learning & AI: PyTorch, LSTM Networks, LLMs, LangChain, Scikit-learn, TensorFlow
Data & Visualization: MySQL, Power BI, Tableau, Looker Studio, Structured Data Parsing

EXPERIENCE

Parallel Learning <i>Software Intern</i>	Pune 09/2025 – 01/2026
- Cloud Deployments & Workflow Automation: Executed multiple web application and service deployments across AWS EC2 and S3 instances, while automating internal operational tasks to reduce manual work by 4%. - System & API Optimization: Refactored complex MySQL queries and optimized backend API execution, cutting response latency by 25% and ensuring seamless data throughput. - Cross-Functional Collaboration: Partnered with non-technical stakeholders to translate business requirements into functional, automated software workflows.	

PROJECTS

AI-Powered Legal Document Translation <i>Sponsored Project</i>	Python, Flask, NLP 2026
- Fine-tuned the Sarvam LLM locally on legal corpora to achieve high accuracy in specialized legal domain phrasing. - Utilized PyMuPDF for document parsing and integrated REST endpoints delivering structured JSON outputs across 150+ test documents. - Engineered validation scripts ensuring outputs maintained 98% structural compliance with strict formatting standards.	
Automated Candlestick Predictor (Predictive Engine) <i>Personal Project</i>	PyTorch, FastAPI, React 2026
- Built a real-time predictive pipeline processing over 1,000 daily market data events via WebSockets with 99.9% uptime. - Engineered a PyTorch-based LSTM model analyzing sequential time-series patterns across 60-candle windows to forecast price returns. - Configured GitHub Actions cron triggers for automated inference execution and live dashboard telemetry updates.	
Intelligent Knowledge Assistant (RAG Pipeline) <i>Personal Project</i>	LangChain, Vector DB 2026
- Designed a Retrieval-Augmented Generation (RAG) system using LangChain and Vector Databases for rapid semantic query processing across private datasets. - Implemented automated evaluation metrics that reduced hallucination rates by 30% and verified query output reliability.	

CERTIFICATIONS

Supervised Machine Learning (DeepLearning.AI) | Data Analytics Program (Godrej)

LEADERSHIP & CO-CURRICULAR

Treasurer, Team Sanskriti: Oversaw financial planning and budget allocation for college cultural events.
Management Team, Team Devkraft: Organized technical events for 500+ attendees, directing logistics and execution.
Coding Member, Team Airawat: Collaborated on technical development for an E-Bike engineering initiative.
Hackathons: Participant in Devclash 24-hour Hackathon.
